

Laurel Dell Elementary School

Shoring and Drilling at Existing Retaining Wall

Dear Laurel Dell Elementary School Community,

We wanted to provide you a quick look ahead of the construction schedule.

The construction team is planning to do drilling work along the existing retaining wall that is adjacent to one of the new classroom buildings. The drilled holes will be filled with steel beams and concrete that will provide additional support to the wall during construction and after project completion.

The work is planned to take place this Tuesday, 1/22, and Wednesday, 1/23.

If you have any questions, please contact Dr. Dan Zaich, Senior Director, Capital Improvements
