Terra Linda High School Community Notice

As the Fall semester quickly approaches, the construction of the Innovations Hub is complete! We are so thrilled with this new modern space that inspires innovation and collaboration for our students, faculty and staff! The center of the Innovations Hub is an expansive and open area with movable seating options that allow for various size groups and collaboration/meeting needs, as well as private project break-out rooms. In addition, the Innovations Hub is the new home to our Computer Lab, Digital Arts and Media Center/Classrooms, and Physics Classroom/Lab. Please note, coming soon is the Innovations Hub Quad conceptual design

The Student Commons project construction continued over the summer, with installation of significant underground utilities and foundation work. When completed in 2021, the two-story Student Commons will include a new Library, Cafeteria, and centers for Music and Drama.

Lastly, but incredibly exciting, planning for the new gym and frontage/parking improvements has begun and construction is expected to begin 2020.
