## Terra Linda High School East Quad & Parking Lot Project Update

Construction on the East Quad and Parking Lot is proceeding quickly over the summer. Crews are building forms, setting rebar, and pouring concrete walls and curbs. The project includes an upper student plaza area with new concrete, landscape planters, seating and accessible ramps and stairs. The parking lot includes new paving, a better driving and parking layout, landscape planters, and safety lighting. The new upper plaza area will be a focus of entry into the main classroom wings. We are excited to complete the makeover of the entire Terra Linda frontage.
