San Pedro Elementary School Community Notice

Construction at San Pedro Elementary School is underway!

Since July, the contractor has installed new underground utilities and prepared the site for building foundations. Some trees and plants were removed to accommodate the new buildings with significant and beautiful new landscaping planned for the future.

Construction of the new buildings begins this fall. Four new state-of-the-art Kindergarten, one PreK, and one Transitional Kindergarten classrooms with restrooms and dedicated play areas will be built. Next to the Kindergarten is a new Administration Building and new campus entrance. It will be much easier to find the main office and school entrance, designed to be attractive and safe for students, teachers, staff and parents.

Tucked between the new Transitional Kindergarten building and the Kindergarten building is a new shade structure for shade in the heat and shelter when it rains.

The Capital Facilities Team is preparing construction drawings for the modernization of Building A. Existing classrooms will be upgraded, and the offices will be updated for counseling and school services. The parking lot will also be expanded, thus easing the congestion into the main parking lot. This work commences next year.

We hope you continue to be excited with the progress at San Pedro Elementary School!

Here is our upcoming schedule:

- Grading and utility installation to be completed this Fall
- Foundations and above-grade construction on new buildings begin this Fall
- Completion of new buildings, shade structure & Kindergarten play yards in late Spring of 2019
- Administrative offices Kindergartens move to new buildings approximately Summer of 2019
