

Venetia Valley Elementary School Community Notice

We are excited to share the Venetia Valley School Modernization Project is on plan and scheduled for completion and move-in December 2020!

The new two-story classroom and multi-purpose buildings' exteriors are near complete, while interior building finishes are progressing, including flooring, casework, ceiling tiles, mechanical installation, and equipment start-up to activate the buildings. We are beginning the exterior hardscape, landscaping beds and irrigation work, with planting scheduled for Fall.

Planning is underway (depending upon budget constraints) to enhance the front entrance to the school along N. San Pedro Road and include realigning the driveway to allow for longer queue space and reduce the impediment of the shared turn lane with the Jewish Community Center directly across the street from the school. Also, the enhanced front entrance will provide improved ADA access to the public right of way (bus stop).

Here is our upcoming schedule:

- **8/13 to 8/14:** Minor asphalt repairs at the front entry, at the back driveway, and in the Kinder area near the garden.
- **9/30 to 10/1:** Asphalt lay down of the fire road on the east side of the new classroom building (near the property line, adjacent to neighbor homes).
- **Current to November:** Continue buildings' interior, exterior and front entry construction.
- **December 2020:** Complete construction and move-in.
