Venetia Valley School

Supplemental Construction Update

Temporary Kinder Area Entrance Path

On Monday 11/19/18, Alten Construction will be realigning the construction fences in preparation for the demolition of Building D, E, and F. This will close off access to the corridor leading to the kinder area. The new path of travel to enter the kinder area will take students and staff around the front of the East side of campus to the newly paved path leading into the kinder area, as shown above. This fence configuration will stay in place for the duration of construction.

Projected Dates of Work: 11/19/18 to End of Project
